SUMMARY

Senior Full Stack JavaScript Engineer with 5+ years of experience delivering SaaS products for 100K+ registered users. Owns features end-to-end across React, TypeScript, NestJS, and MySQL — from frontend architecture and API design to database transactions and production releases. Architected five React applications from scratch, modernized a 16-year-old PHP system, and optimized search across 475K athlete records.

PROFESSIONAL EXPERIENCE

ITRDev | Mar 2021 – Present

SaaS recruiting platform for colleges, athletes, and clubs

Full Stack JavaScript Developer | May 2024 – Present

- Modernized a 16-year-old PHP application into React and NestJS in six months; owned the frontend rewrite, backend architecture, and most backend implementation while preserving compatibility with the shared legacy MySQL database.
- Owned architecture and delivery across six React applications (five built from scratch), plus NestJS APIs, database changes, and production features delivered end-to-end.
- Reduced athlete search API latency from ~4–5s to ~0.8–1.5s across 475K athlete records by optimizing SQL JOINs, indexes, and batched retrieval alongside a DBA.
- Designed credit-based membership purchases using MySQL transactions, row-level locking, and conditional deductions to prevent concurrent overspending and keep four tables consistent.
- Delivered recruiting and athlete-management workflows spanning React interfaces, NestJS APIs, database models, and AWS S3 integrations; worked directly with stakeholders on requirements and releases.
- Introduced an AI-DLC-inspired workflow using specialized agents for planning, implementation, debugging, and review, with human oversight of architecture, security, and database changes.

Frontend Developer | Jun 2021 – May 2024

- Reduced DOM nodes on a key athlete profile page by 83% (from 6,612 to 1,123) by removing duplicate responsive layouts, lazy-mounting forms, and stabilizing React renders.
- Built a recruiting Kanban board with rule-based athlete grouping, multi-level drag-and-drop, optimistic updates, and rollback for college coaches.
- Built HLS streaming interfaces with playback recovery and WebSocket score synchronization; mentored two frontend developers through code reviews.

Trainee Full Stack JavaScript Developer | Mar 2021 – Jun 2021

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Redux, Zustand, TanStack Query, React Hook Form, Zod, Material UI, Ant Design, Tailwind CSS
Backend: Node.js, NestJS, REST APIs, MySQL, PostgreSQL (limited), Knex, TypeORM, Redis, Keycloak, AWS S3, SQL, transactions
Testing & Tools: Jest, Vitest, Docker, GitLab CI/CD, Sentry, OpenTelemetry, Grafana, WebSockets, HLS.js, Stripe
AI-assisted Engineering: AI-DLC-inspired workflows, Claude Code, Cursor, AI agents/subagents, rules, hooks, reusable skills

EDUCATION & LANGUAGES

MSc, Computer Engineering — Kharkiv National University of Radioelectronics, 2021–2022
BSc, Electrical Power Supply — Ukrainian State University of Railway Transport, 2018–2021
Languages: English B2 · Ukrainian Native
